

AI Developer 2 — Compliance AI Service

Project Overview:

This AI microservice provides compliance-related AI functionalities using Flask, Groq LLM, ChromaDB, and Redis caching.

Tech Stack:

- Python
- Flask
- Groq API
- ChromaDB
- Redis
- GitHub

Endpoints:

1. /health
2. /categorise
3. /query
4. /generate-report
5. /metrics
6. /

Features:

- AI-powered compliance assistance
- Vector database integration
- Health monitoring
- Fallback handling
- Modular Flask architecture

GitHub Repository:

<https://github.com/Vikas4AD22CS123/compliance-obligation-register.git>

Demo Preparedness:

- Backup screenshots prepared
- API endpoints tested
- Project pushed to GitHub
